Facility Fire Action Plans

- Provides emergency information for Fire Pre-Planning activities
- Incorporates pictures of facility and fire systems
- Includes aerial photographs of facility
- Includes CAD drawings of individual tank fire plans

Description of Facility Fire Action Plans:

At Storb Environmental, Inc., we provide the most up-to-date and advanced services to our clients. Our Facility Fire Action Plan is one example of our advanced services. A Facility Fire Action Plan is an emergency information plan used for fire pre-planning activities. The plan can be used by facility personnel and emergency response personnel for awareness and emergency response training. The Facility Fire Action Plan starts off by identifying areas in and around the facility. The plan then goes through responsible party information, emergency responder information, storage tank information, fire plans, fire response systems, and facility exposures. The Facility Fire Action Plan is a suggested tool for emergency response planning and is a great tool for training.
